

**El Segundo Energy Center**  
*Meeting California's Energy Needs with Environmental Responsibility*  
Transmission Tower Installation – September 5, 6, and 9, 2012

Overview

Power plant owner, El Segundo Power, LLC, has begun construction on a new, highly efficient replacement power plant scheduled for completion in 2013. The replacement power plant's air-cooled, rapid-start combined cycle units will be well-suited to respond quickly and efficiently to Southern California's energy needs and will integrate with renewable energy projects coming to our State's energy infrastructure. You may have noticed that Units 1 and 2 – the two retired 1950s steam boiler units at the El Segundo Generating Station have been removed. The new power plant is currently being constructed at the northern end of the power plant property, in the space formerly occupied by Units 1 and 2.

Construction Update

All aspects of the construction for the new highly efficient rapid-start combined cycle units are well underway with many of the critical components of the new plant having already been installed. As part of this construction, El Segundo Power, LLC, owner of the El Segundo Generating Station (301 Vista del Mar Blvd, El Segundo) will be installing three electrical transmission towers adjacent to Vista del Mar, one quarter mile north of 45<sup>th</sup> Street. The work will be performed at night from 9:00 P.M. to 5:00 A.M. to avoid traffic impacts. Workers will lift from street level preconstructed sections of the tower into position to allow for the installation of the towers.

The work requires Vista Del Mar / Highland Avenue from Rosecrans Avenue to Grand Avenue to be closed for three nights between the hours of 9 PM to 5 AM. The closure is scheduled for the nights of Wednesday September 5, Thursday September 6, and Sunday September 9. Traffic will be detoured around the closure via Rosecrans Avenue, Sepulveda Boulevard and Grand Avenue. Local Access will be maintained.

The work will be performed by Henkels and McCoy.

If you have questions regarding the work, please feel free to reach out to us:

During night time closure, Regional Communications Center (310) 545-4566

Noise Notification Reminder

El Segundo Power maintains a 24-hour “hotline” for the public to ask any questions or express any noise-related concerns that may arise during construction of the El Segundo Energy Center Project. Callers will be prompted to record a voicemail message which will be immediately transferred to the project’s Noise Monitoring Officer who is qualified to address the concern or comment. Callers may also press “0” to be directed to a person who will collect information about your concern or comment and direct it to the Noise Monitoring Officer.

**Noise Comment Hotline  
1-888-312-0881**

Please do not hesitate to call with any questions or concerns that you may have. Thank you.
