Project Overview

- What is being done and why?
  - 18-month project to dismantle and remove Unit 3 and associated support systems
  - Required by SCAQMD
  - Southwest corner of the Scattergood Generating Station property near West Grand Avenue and Vista Del Mar
  - Substantial completion expected by February 2018 (weather permitting)
What to Expect

- **Demolition work authorized to be performed** between 7:00 A.M. to 6:00 P.M., five days a week, excluding holidays and weekends, unless required and/or authorized by LADWP.

- **Truck Route within City of Los Angeles**, along Vista Del Mar and Imperial Highway

- **Short Duration Street or Lane Closures** for equipment access. Bicycle paths and sidewalks will remain open for public use and safety personnel (flaggers) will be posted as needed.

- **No Explosives!** The dismantling of Unit 3 is being done piece by piece and removed by crane, debris/recyclables are hauled-off by licensed trucks.

- **Major Activities** will include rotor hammering of concrete columns and dismantling of steam stack.
Being a Good Neighbor

- Daily testing is conducted to monitor noise, vibration and dust. Air monitoring is conducted periodically or as needed.
- Air and asbestos technician monitoring full time.
- Noise and vibration is monitored at the fence line and compared to ambient standards.
- In order to minimize noise, staging of equipment takes place on the south side of West Grand Avenue.
Keeping You Informed
