Public Works Department NOTICE OF IMMINENT CONSTRUCTION PUMP STATION #1 AND #7 MODIFICATIONS PROJECT

June 22, 2017

Dear Property or Business Owner:

Subject: **Construction Notice for Pump Stations #1 & #7 Modifications Project
Project No. PW 16-07**

**City of El Segundo Public Works Department &
Steve P. Rados, Inc. (Contractor)**

Duration: **July 2017 to July 2018**

Location: **See attached Location Map**

This letter serves to notify you that the City of El Segundo Public Works Department will be upgrading its outdated and less efficient sewer pump/lift stations beginning this month. This project is part of an ongoing commitment to provide you with the best service and high-quality, safe, and reliable public utility.

The project includes consolidation of sewer pump station 1 (Acacia Ave at the park) and pump station 7 (Palm Ave. and Virginia St.), addition of sewage storage capacity, installation of new pumps and related equipment, installation of a backup diesel powered generator, installation of new electrical control and telemetry systems, and realignment of sewer force main pipe within the street right-of-way instead of private properties via an easement. The project will also replace the broken emergency generator for pump station #4 at Kansas St. and Holly Ave. We will start the upgrade in July with Steve P. Rados, Inc., our contractor. It will take approximately 12 months for Steve P. Rados, Inc.'s crew to complete the pump station systems upgrade.

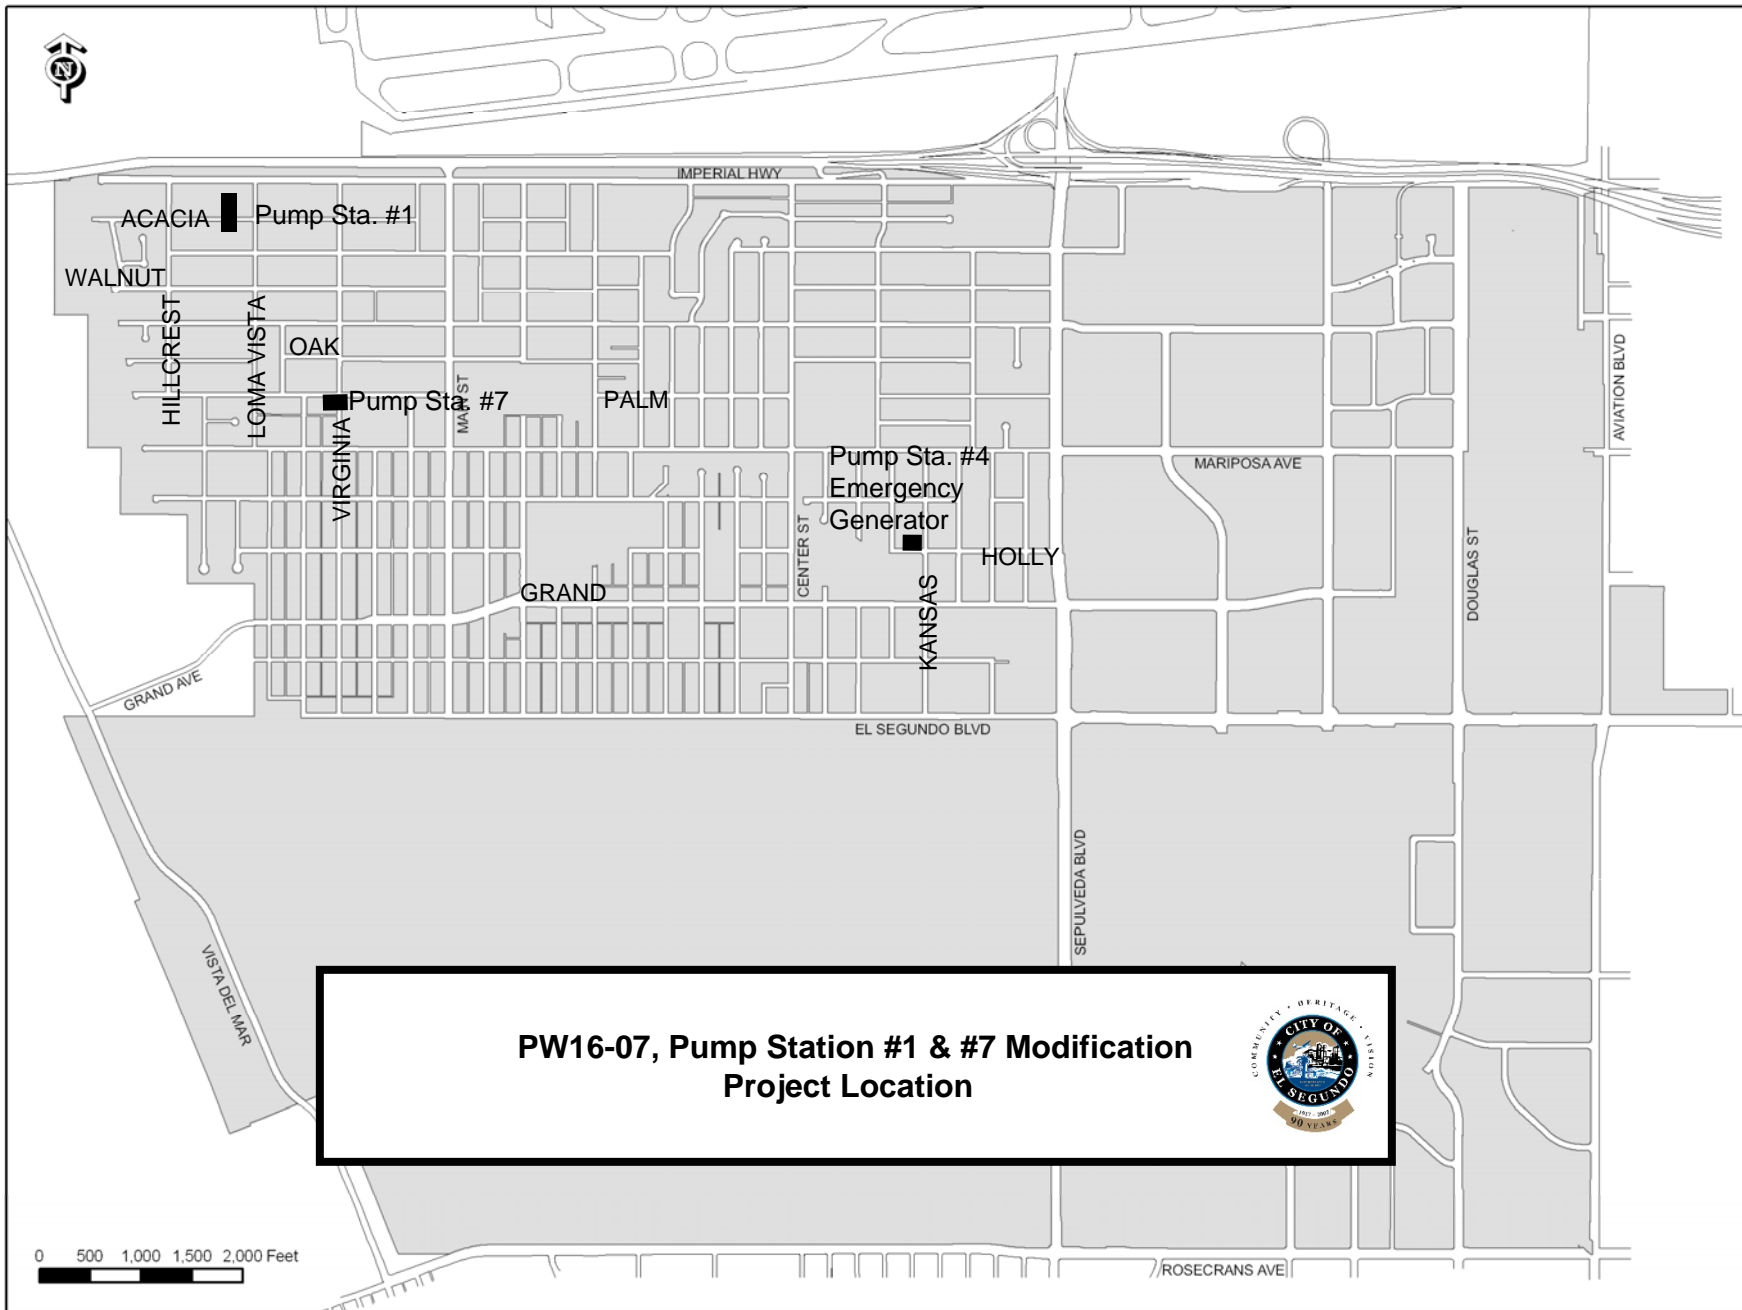

A second letter will be hand delivered to you by the contractor closer to the actual construction time for your street block. This second notice will provide more information regarding the specific construction days, times, and any roadway closures.

Please inform tenants and other regular users of your building of construction activities as well so they may plan accordingly.

For any questions or assistance, the contractor will be available to help every day at the job site.

Thank you,

Lifan Xu
City of El Segundo
(310) 524-2368
