Green Business Certification Program

Dear El Segundo Business Owner,

The City of El Segundo has recently received a grant from the California Green Business Network, which provides a certification program that will help businesses become more environmentally sustainable and responsible. Certification in the Program includes the implementation of best management practices that address energy efficiency, waste reduction, water conservation, and a number of other “green” practices that will help your business and save you money.

The City of El Segundo has partnered with the Environmental Services Center of the South Bay Cities Council of Governments to help administer the grant, and their staff will be doing outreach to El Segundo businesses. Please consider learning more about this program and participating to help your business save resources and reduce costs.

To learn more about the program, please visit www.GreenBusinessCA.org. You can contact Martha Segovia at the Environmental Services Center by email at martha@southbaycities.org or by calling 310-371-7222, extension 209.

Sincerely,

Elias K. Sassoon, Director
Public Works Department
