Hi all,

I am waiting to report some incredibly unsafe driving conditions on El Segundo Blvd going west starting at Douglas. The traffic management program with the construction is not working. I saw two near accidents while making a turn and a group of kids almost run over walking to school. Given what occurred a few months ago, I cannot emphasize enough how important it is that you get the trench on the corner of Nash and El Segundo filled in and traffic moving properly again or I fear there will be a serious accident.

Thanks,  
Daniel

Dear Mr. Murillo:

Thanks for reaching out to us.

Please note that staff has been working diligently with the contractor for the removal of the existing ramp/sidewalk at the intersection of El Segundo Blvd and Douglas, doing the re-grading, and setting-up forms for concrete-pour of permanent ramp/sidewalk for the past week and half. Couple of factors which have slowed-down the process have been the inclement weather conditions and one holiday. It was anticipated that the concrete-pour would take place today, but unfortunately this plan did not work-out. It is anticipated that the concrete-pour takes place early next week. At the meantime, staff has been monitoring the traffic control set-up to ensure the safety of the pedestrians and vehicular traffic.

I personally called you earlier this morning and left you a voicemail as well.

Please let me know if you have any further questions.

Best,

**Elias Sassoon, Director**

**Subject:** El Segundo Blvd.

Hi all, I am running to express some shock over the fact there has been an open trench on the corner of El Segundo Blvd. and Douglas for about 3 weeks now. A good construction management plan should've had this opened and closed quickly given how important this intersection is. I would strongly encourage getting this closed out to base ASAP as it is highly disruptive to traffic and dangerous given how many children walk through it on their way to school.
